

WRIA 2, SAN JUAN ISLANDS

Marsh Distribution

Distribution lines depict where salt tolerant plants (such as *Salicornia virginica*, *Triglochin maritima*, *Carex* sp.) are continuous or patchy. This data is derived from the Washington Shore Zone Inventory (Feb. 2001). It includes saltmarsh, sedge, lowmarsh and mixmarsh conditions combined into a single distribution for both patchy and continuous attributes.

Map Projection: Lambert Conformal Conic (WA Stateplane South)
Zone: 5626 Datum: NAD 1927 Units: Feet
Data derived from DNR: Hydrography, Resolution Scale 1:24000, Transportation Resolution Scale 1:24000
Cartography By: Ronald McFarlane, NWIFC, December 2001
